510-2D Digital Bar Code Reader

The 510-2D Digital Bar Code scanner brings 2D bar code scanning to Worth Data customers! The 510-2D can be utilized as a USB keyboard output scanner on any PC running Windows 2000 or XP (Windows 98 is not supported). Scanned data is displayed on the PC as keyboard data - transparent to the host application.

Using the 510-2D reader to scan bar codes is easy since it reads omni-directionally - simply point and shoot! No matter how the bar code is oriented, the 510-2D provides a quick and accurate read.

1D bar code types supported are UPC/EAN, UCC-EAN 128, Code 39, Full ASCII Code 39, TriOptic Code 39, Code 128, Codabar, MSI, Code 11, RSS and RSS variants, Interleaved 2 of 5, Standard 2 of 5, Bookland EAN, Code 93.

The 510-2D reader also provides scanning of 2D bar codes such as PDF417, microPDF417, MaxiCode, DataMatrix (ECC 2000) Composite Codes, and QR Code, as well as the Postal Codes US Postnet, US Planet, UK, Japan, Australian and Dutch.

A "stand" scanning mode is available for this laser for use with our optional stand (\$69); this allows you to present bar coded items to the scanner without having to pull the trigger.

See our website for new product announcements as well as details on any of our products!
