

KwikCount/EX

Inventory Add-in for Excel® for Windows®

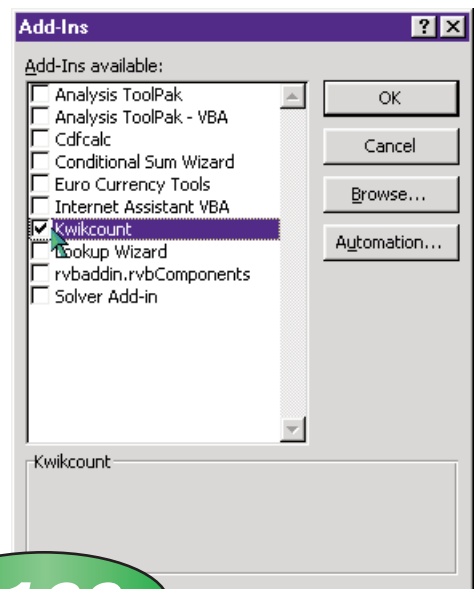

Use your existing Excel worksheet to make inventory control easier!

KwikCount/EX greatly simplifies inventory counting using batch data collectors, the TriCoder Portable Readers, with almost any existing Excel inventory management worksheet. After scanning inventory labels and keying the associated quantities, KwikCount/EX provides an integrated add-in on the Excel worksheet to update the quantities in the worksheets. Worries about sortation and out-of-sequence data are eliminated by the KwikCount/EX add-in. Regardless of sequencing, the correct items are located and the corresponding quantities are overwritten, accumulated, or subtracted.

Easy to Use!

Inventory Add-in for Excel!

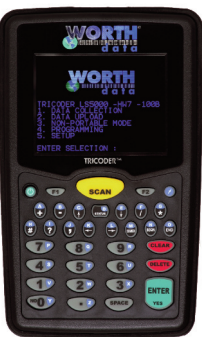

The Add-in can be used for...

- Physical Inventories
- Receiving accounting
- Shipping accounting

KwikCount uses the highly acclaimed TriCoder Portable Reader as an input device. It supports all possible interfaces:

- USB HID Keyboard
- Full Speed USB Upload and
- RS-232 Serial port (com)

Multiple uploads, using one or more TriCoders are supported, allowing accumulation in the uploads to the worksheet. There is also an option to automatically generate a new column of item numbers, which then can be printed as a bar code label in convenient item or shelf sizes.

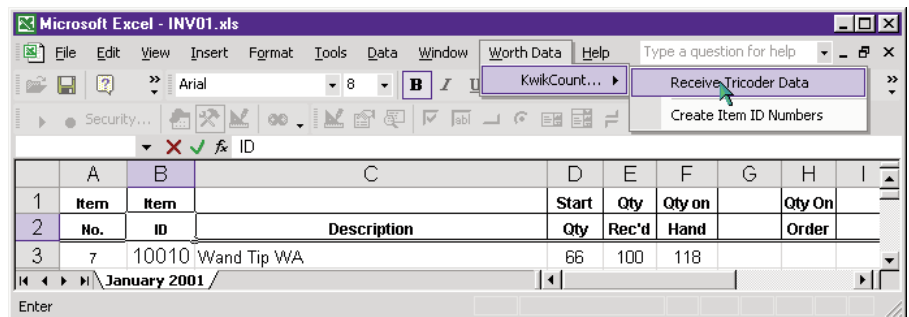

TriCoder pricing starts at...

- T5000 TriCoder complete with LZ160 laser Scanner & USB Cable - **\$684**
- LT5000 TriCoder with Integrated Laser and Gun Handle - **\$999**

single user license only...

\$129

KwikCount/EX requires...

- Microsoft Excel 2000 or later
- One or more Worth Data TriCoders
- Shelf or item bar code labels to match the item ID's in Excel worksheet
- A worksheet with inventory data arranged in a single row

The license cost for KwikCount/EX is **\$129 Free When Purchased With a TriCoder**
