USB Bar Code Slot Reader

Our new SLV-WDP combines our popular WDP USB decoder and our F59 slot scanner into one compact and easy to use unit. This reader features a built-in USB port for true plug-and-play compatibility on PC or Mac. With the decoder built in, badge and card scanning has never been easier!

All software which accepts keyed input will accept bar code reader input without change; no additional software is needed to read bar codes into your applications. The computer and software see bar code data as coming from a fast keyboard operator.

This unit features our outstanding reading algorithms for quick decoding. Complete with USB cable, the price is only **\$245**. This unit is also available as the SLI-WDP for infrared reading. Warranty is 2 years.

Slot Badge Pricing

Model No.	Description	Price
SLV-WDP	Visible Light Slot Badge Reader	\$245
SLI-WDP*	Infrared Slot Badge Reader	\$245

\$245

Price includes:

- SLV-WDP or SLI-WDP Slot Reader
- USB Cable

- For use with Windows and Mac USB
- USB port built-in - no separate adapter!
- No software changes needed - Plug and Play
- Bar codes transmitted as keystrokes
- No additional decoder required - it's all built in!
- Visible light (SLV) or Infrared scanning (SLI)
- All keyboard keys emulated
- Foreign keyboard support
- Superior decoding firmware
- FCC and EC approved
- 100 + configurable options
- Two Year Warranty

The SLI-WDP requires bar codes printed with infrared quality ink.

Make sure to verify with your badge supplier that the bar codes you are using can be scanned using an infrared scanner.

Coppell High Library

"Your technical support person was patient and professional, even with my constant questions."

"Your company has made a client for life in me."

Ruth Pinchot
- Lead Librarian,
Coppell High School

For optimal scanning, make sure the center of your bar code is positioned .5" from the bottom of your card or badge as shown above.
