530-2D-USB Bar Code Scanner

The 530-2D-USB Digital Bar Code scanner brings 2D bar code scanning to Worth Data customers! The 530-2D attaches as a USB keyboard and is compatible with any PC running Windows® 10, 8, 7, Vista, or XP, along with Macintosh® computers running macOS or Mac OS X. Scanned data is displayed on the PC as keyboard data - scan data into any application, just place the cursor where you want bar code data and press the trigger to scan - it is that easy!

Using the 530-2D reader to scan bar codes is easy since it reads omni-directionally - simply point and shoot! No matter how the bar code is oriented, the 530-2D provides a quick and accurate read.

1D bar code types supported are UPC/EAN, UCC-EAN 128, Code 39, Full ASCII Code 39, TriOptic Code 39, Code 128, Codabar, MSI, Code 11, GS1 DataBar (RSS-14 GTIN), Interleaved 2 of 5, Standard 2 of 5, Bookland EAN, Code 93 and others.

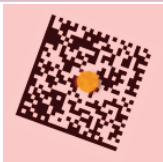

The 530-2D reader also scans all popular 2D matrix bar codes such as PDF417, microPDF417, MaxiCode, DataMatrix (ECC 2000, ECC1400) Composite Codes, and QR Code, as well as postal codes including US Postnet, USPS Intelligent Mail Codes (IMBC), US Planet, and international postal codes for UK, Japan, Australia, and the Netherlands.

A "stand" scanning mode is available for this scanner for use with our optional hands-free stand (\$49); this allows you to present bar coded items to the scanner without having to pull the trigger.

See our website for new product announcements as well as details on any of our products!

Components International

"I wanted to let you know how happy we are with your reader. My system is operating flawlessly and bar coding is saving us time and money and reducing errors.

It's really a pleasure working with a company that cares about the success of their product and the satisfaction of their customers."

Darell West
