- Quality products, quality service Since 1985!

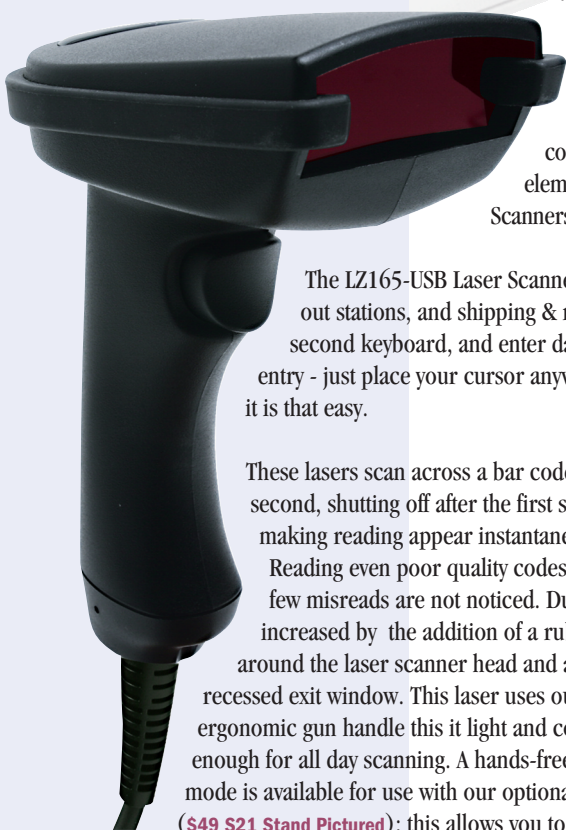

The Worth Data LZ165-USB Keyboard USB bar code scanners for fast accurate bar code scanning into a computer running Windows, macOS, or Linux. Scanned bar code data appears on your computer as if the data had been keyed in - there are no software changes required. All software that accepts keyboard data will accept bar code data too.

The LZ165-USB Laser Scanner is our entry level laser scanner. These scanners are Made in the USA of US & Imported parts right in our California office. They are designed and assembled with our decoding CPU & firmware that offers the best scanning accuracy on the market, you won't find a better reading laser for the price. The LZ165-USB Laser Scanner features a high speed laser scan engine and is built to withstand multiple 5ft drops to concrete.

The LZ165-USB features distance scanning up to 9" inches away on a medium density bar code and it reads any type of printed media including high density bar codes with 3.3 mil (.0033") narrow elements. The warranty on the LZ165-USB Laser Scanners is 3 years.

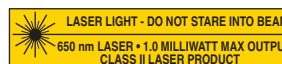

The LZ165-USB Laser Scanner is well suited for retail use, POS, check-out stations, and shipping & receiveing. These scanners attach as a second keyboard, and enter data into any application - just like keyed entry - just place your cursor anywhere you want bar code entry and scan - it is that easy.

These lasers scan across a bar code at 48 times per second, shutting off after the first successful read, making reading appear instantaneous to the user. Reading even poor quality codes is fast because a few misreads are not noticed. Durability is greatly increased by the addition of a rubber bumper around the laser scanner head and a scratch resistant recessed exit window. This laser uses our rugged ergonomic gun handle this it light and comfortable enough for all day scanning. A hands-free "stand" scanning mode is available for use with our optional stands (\$49 S21 Stand Pictured); this allows you to present bar coded items to the scanner.
