## LZ365-USB Bar Code Readers

The Worth Data LZ365-USB USB bar code scanners for fast accurate bar code scanning into a computer running Windows, macOS, or Linux. Scanned bar code data appears on your computer as if the data had been keyed in - there are no software changes required. All software that accepts keyboard data will accept bar code data too. Just scan a bar code and the data will appear wherever your cursor is placed - it is that easy!

The LZ365-USB Laser Scanners are rugged industrial-quality bar code laser readers. Combined with our decoding firmware, you won't find a better reading laser. The LZ365-USB Laser Scanners features a high speed laser scan engine and are built to withstand multiple 5 ft drops to concrete. The LZ365-USB features distance scanning up to 13 inches away on a medium density bar code and it reads any type of 1D bar codes. These scanners are Made in the USA of US & Imported parts right in our California office. The warranty on the LZ365-USB is 3 years.

This laser uses our rugged ergonomic gun handle that is lightweight and comfortable enough for all day scanning. This scanner easily reads all popular 1D bar codes including; Code 39, UPC, EAN, Code 128, GS1-DataBar, ITF Interleaved 2of5, MSI Plessey, Code 93, Codabar and many others.

The LZ365-USB lasers scans 100 times per second, shutting off after the first successful read, making reading appear instantaneous to the user. Reading even poor quality codes is fast because a few misreads are not noticed. Durability is greatly increased by the addition of rubber bumpers around the top of the gun and a robust .060" thick scratch resistant acrylic laser scan window that is recessed.

A Hands-Free "stand" scanning mode is available for use with our optional stand (\$49 S21 Stand Pictured); this allows you to present bar coded items to the scanner.
