## RF Wireless Scanners

Get rid of that annoying cord! These cordless RF Bar Code Scanners can operate up to 500 feet from their USB Base Station receiver which attaches to your computer by USB. These scanners are perfect for shipping and receiving departments. We offer 2 models of RF Laser Scanners; The **LZ360-RF** and the **LZ404-RF**, plus a **520-RF** 2D Omni-Directional imaging scanner for scanning 1D & 2D matrix bar codes. Each use the same radio and talk to a **B700 USB Base Station**.

from  
**\$399**  
complete!

### RF Scanners

These "point-and-shoot" scanners beep when they receive an acknowledgement from the base station. You don't have to be in hearing range of the base station. 1-10 of these radio frequency scanners can talk to the same B700 USB base station. The USB Base Station attaches via USB, to a Windows®, Mac, or Linux computer as a Keyboard or Serial Device.

#### Up to 500 foot wireless range!

These RF Laser scanners can operate up to 500 feet from the base station in an open area. In a typical office or warehouse configuration, range will depend upon the operating environment - transmitting through walls and other obstacles will reduce range. Our robust frequency-hopping spread spectrum 2.4Ghz RF technology assures great range, even under difficult conditions.

#### Easy to use

These cordless scanners are easy to use - just aim and pull the trigger! There is no external antenna to break off and charging the battery is easy. The lithium ion battery in the scanner provides long battery life - Up to 48 hours of continuous use/25,000 scans - with fast 3 hour recharge. For recharging a power supply is included with each RF scan gun purchased. No power supply is needed for the B700 USB base station - it gets its power from the host computer USB port.

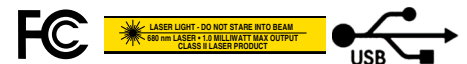

- Choice of 3 RF Scanners: LZ360-RF & LZ404-RF RF Lasers, or 520-RF 2D Scanner
- B700 Base attaches via USB as a HID Keyboard or Serial CDC COM Port Device
- Range up to 500 ft. from Base in open area
- Spread Spectrum 2.4Ghz RF Technology
- 1-10 Scanners per Base
- Ideal for shipping/receiving
- No external antenna on Gun
- Approved for license-free operation in USA & Canada
- Built-in rechargeable Li-ion battery
- Confirmation beep and LED on Laser for radio acknowledgement
- Made in the USA of U.S. and Imported Parts

B700-2D	1 2D Base Station	\$ 100
520-RF	1 2D Cordless Scanner	\$ 659
<b>Total</b>		<b>\$ 759</b>

These scanners can read all widths of bar codes and the LZ360 reads 12" away from a typical bar code. The Industrial model LZ404-RF has improved optics, an optional aiming dot for easier scanning, with 20% increased bar code scanning range, plus very high density bar code reading down bars as small as 2.4mil (.064mm). The RF Scanners all have a 3 year warranty.

The B700 USB Base Station connects to any PC running Windows 10, 8, 7, Vista, & XP - 32 & 64bit compatible - macOS, Mac OS X, and Linux systems
