USB Bar Code Slot Reader

Our SLV-USB slot badge scanner uses our popular WDP USB output bar code decoder for easy attachment to a computer in one compact and easy to use unit. This reader features a built-in USB cable for true plug-and-play compatibility on Windows® PC or Mac. Our built-in advanced bar code decoder makes badge and card scanning fast and accurate!

All software which accepts keyed input will accept bar code reader input without change; no additional software is needed to read bar codes into your applications. The computer and software see bar code data as coming from a fast keyboard operator.

This unit features our outstanding reading algorithms for quick decoding. Complete with USB cable, the price is only **\$149**. This unit is also available as the SLI-USB for infrared reading. Warranty is 2 years.

Slot Badge Pricing

Coppell High Library

"Your technical support person was patient and professional, even with my constant questions."

"Your company has made a client for life in me."

Ruth Pinchot
- Lead Librarian,
Coppell High School

The SLI-USB requires bar codes printed with infrared quality ink.

Make sure to verify with your badge supplier that the bar codes you are using can be scanned using an infrared scanner.

For optimal scanning, make sure the center of your bar code is positioned .5" from the bottom of your card or badge as shown above.
